

BaseCore™

PaveCore Eco Paver

Product Specification Sheet

PaveCore is a sustainable, durable, and easy-to-install plastic paver system that's perfect for outdoor projects. Its interlocking design provides exceptional strength and stability, making it a top choice for reinforcing surfaces.

- **Size:** 333 x 333 x 50mm
- **Material:** High Quality HDPE
- **Weight:** 680g/pc
- **Packing:** 9pcs/bundle
- **Working Life:** more than 10 years

Key Features:

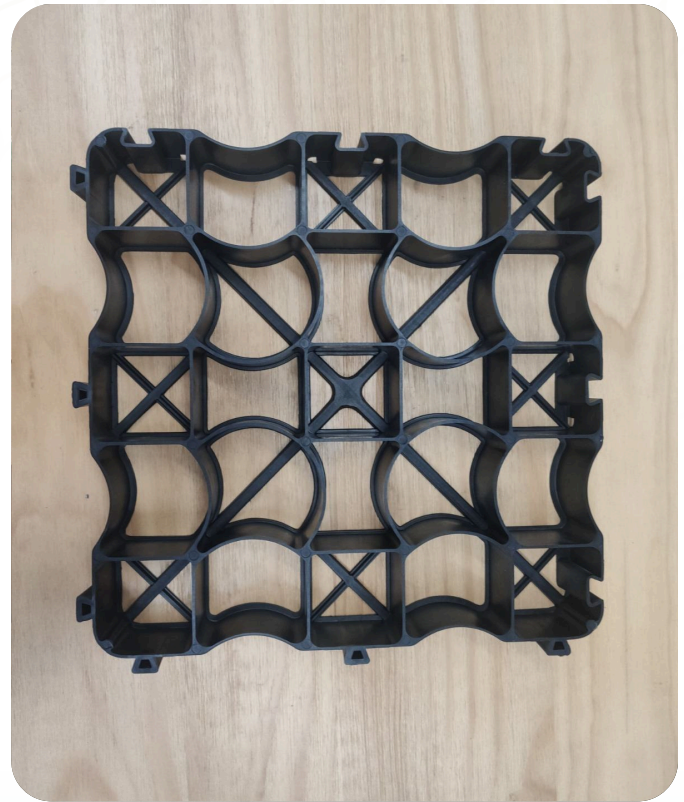

Size and Coverage: Each paver: 13.11in x 13.11in x 1.97in, covers approx. 1.19 sq.ft. One pack (9 pavers): 10.71 sq.ft.

Permeable Materials: High-Density Polyethylene (HDPE) that is 100% Permeable

Easy DIY Installation: Step-by-step installation process for both grass and gravel areas, ensuring a hassle-free experience. No connectors required.

Sturdy Construction: Our cell design ensures excellent load-bearing capacity, with a compression strength of up to 200 tons/sq.m. Ideal for supporting heavy loads and traffic.

Erosion Control: The innovative tongue and groove locking system creates a solid, stable surface that holds the fill in place and reduces erosion and runoff, making it perfect for grassy areas and gravel support.

Installation Made Easy

Secure and Compact Lock: Forms a robust mesh structure for enhanced stability.

Double Edge Reinforcement: Provides mutual support, ensuring reliability and practicality.

Convenient Packaging: Each bundle contains 9 pieces, making it easy to transport and install on-site.
